## your reliable production partner

OneLove is your partner for fashion production.

Bali today is a hot spot of creativity and an important manufacturing hub. With OneLove designers can have their creations **produced to the highest quality standards** at an economic advantage not found anywhere else in the world.

Bali's manufacturers also **cater to small production runs** allowing for exclusivity in the market. It's no wonder that Bali now attracts some of the most talented and gifted fashion designers from all over the world.

Every designer needs the skills and **support of a reliable**

**manufacturer** if they wish to succeed.

Finding these factories can be a challenge, we have a huge network of quality manufacturers and **suppliers who can produce almost anything you can dream up**. Clothing, jewellery, leather goods, shoes, hats, dying, printing and merchandising. We can help you get it made.

Our team has the knowledge skills and network to turn your vision into reality.

# + most common faq

These are the most common FAQ that we are asked. You can also check the full list of over 100 questions on our website answered in detail for every stage of the production process [here](#).

## How Does it Work?

We are hired by fashion designers and clothing retailers to source for and project manage their entire productions from overseas, so they don't need to. We save our clients a lot of time, aggravation, money and resources and deliver a quality well priced final product into your hands.

## How To Get Started?

Choose our [Samples Package](#) to get your full Spec Sheet of all products, patterns, fabrics chosen and samples in your hand or send us your own.

Get a [Bulk Production Quote](#) which will outline the costs from start to finish.

If you are completely new the production and fashion industry and have no idea where to start we recommend a [consultation](#).

## Can OneLove Create Spec Sheets For Me?

Yes. In our starter/sample packages spec sheets are included before samples are made. They are then yours to keep.

## Can OneLove Create Samples For Me

Yes. Sampling is the most important aspect of garment production. Without a blue print for your design production cannot proceed. Once a spec sheet is created, sampling begins. You can give us sketches, pictures, ideas and samples to get started. Exact measurements are preferred.

## What Is The Purpose of Sampling?

Gives designer and manufacturer a blueprint of finished product

Allows true production costs to be established

Allows for revisions to be made before production Allows for product testing

## Can You Do Dying?

If a fabric can hold the dye/print, we can get it done. When choosing colours, we recommend using pantone colour codes this is the international colour standard. The original colour of the product may be different from photos, this is due to lighting, white balance and settings of your monitor. We strongly suggest you receive physical swatch colour sample for approval. We can also offer Eco dyes if this is what you are after. The MOQ for dying ranges from 30m to 1,000m or higher.

## Can You Do Printing?

Yes. We need graphics in correct formats for printing or we can provide you with a graphic designer. Printing can be done on a range of materials. We run print/dye tests on 1m fabric. There are set up costs involved for screen printing and dying. We can do digital printing, screen printing both yardage and placement, batik, and sublimation printing.

## How Does Bulk Production Work?

You need spec sheets and samples ready and then Bulk Production begins. The costs and time for BP vary depending on the detail required to create your product. There are also lead times depending on the time of year and how busy the factory is. For bulk production you need a quote from us.

## Labeling? Shipping? Packaging?

We handle all the labelling, shipping and packaging of your product.

## Can You Assist Me With Launching My Brand?

Yes. We have excellent industry connections and great advice to offer you for launching your brand. Including photographers, marketing professionals etc.
